OurFestival

FOR FESTIVAL ORGANISERS

A festival worth remembering.

Turn your drinks catalogue into a personal tasting experience.
Help guests discover more and remember what they loved.

MAKE EVERY TASTING COUNT

Your festival. In their hands.

A mobile-friendly web app for drinks festivals and tasting events. Bring your catalogue, personal tasting journals and organiser tools together.

01 Find the next favourite

Search by style, country or exhibitor. Plan your tastings and use label scanning to help identify bottles.

02 Make every tasting personal

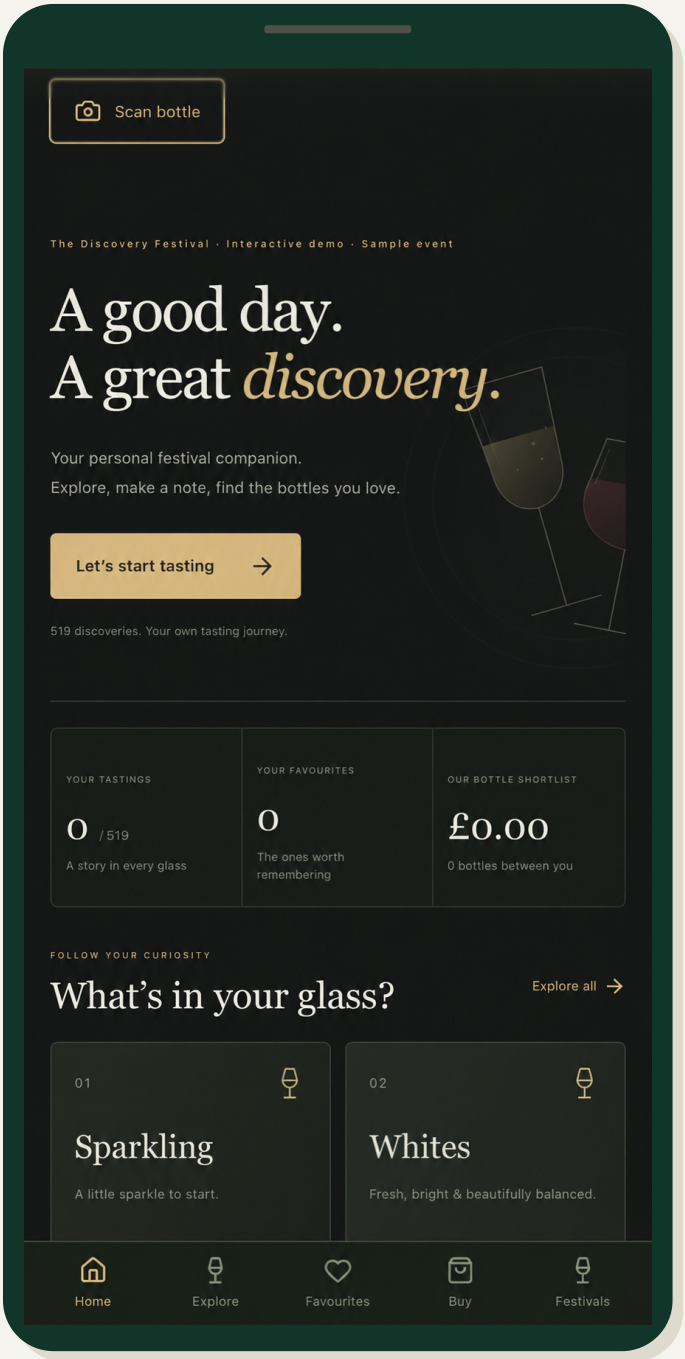

Capture ratings, notes and favourites in a personal journal, while the experience is fresh.

03 Enjoy the day together

Link with a partner by mutual choice. Compare favourites and build a shared bottle shopping list.

04 Take the memories home

Revisit saved discoveries in My Collection after the event, and download tasting records to keep.

Your event, easier to manage.
Your guests, more to discover.

One catalogue, ready to explore

Import your drinks list from Excel and preview it before publishing. Give guests a searchable guide to the bottles and exhibitors at your event.

Learn what guests enjoyed

Review festival-wide participation and tasting summaries, including favourites and ratings. Use these signals to help shape your next event.

Prepare and run your festival

Manage each festival in the Organiser Portal. Schedule catalogue opening and make updates, with approval controls for corrections once the catalogue is live.

Privacy with practical controls

Organiser reports exclude personal tasting notes. Guests choose whether to link and share with a partner, and can end that connection while keeping their own records.

Bring your team on board

Issue attendee codes, allocate passes and give authorised organisers access to their assigned festivals. Keep guest access and management permissions separate.

Protect your catalogue work

Saved catalogue versions and recovery tools help authorised staff correct mistakes. Recorded changes help your team trace updates and keep control of your event records.

A tasting companion, from first discovery to the next favourite.
Personal journals, shared shortlists and organiser tools in one place.

Explore AI Marketing Intelligence

See a demonstration of natural-language questions about festival favourites and bottle shortlists, such as “Which drinks were favourited most?” Designed for authorised organisers, with access limited to their assigned festivals.

Demo available now. AI reporting for real festivals is currently paused.

Book a demonstration and explore how it could fit your festival.

ourfestival.co.uk

Their chosen bottles. Ready for your checkout.

Find the right buy list in moments using a unique code or QR. Download the bottle details, then take payment on your existing card machine.

1

Guest shares their buy list

The guest checks their own bottles and quantities, then creates a code and QR for the organiser. The submitted copy stays fixed until replaced.

2

Organiser looks up the code or scans the QR

Sign in to the assigned festival, enter the code in Orders or scan the QR with a phone camera. Open the matching list without scrolling through surnames.

3

Download the CSV to your computer

Export the order code, attendee name, bottle references, exhibitors, quantities, prices and totals. Use the file alongside your existing checkout process.

4

Confirm the sale and take payment

Confirm stock and the final price, then use your existing card machine. OurFestival does not take or record payment. Direct till integration is not included.

Included as standard for every new festival.
Available when your festival opens, with access for your assigned organisers.

Try the checkout demonstration

Open the Discovery Festival buy list using your owner sign-in. Load sample bottles, create a demo code, open the organiser demo and download its CSV.

Fictional guest details and historical prices. No real order or payment. Reset the demo code to repeat the walkthrough.
